

ANSWER KEY – LETTER SEARCH 2

Answer: Bacteria are microbes and are found in the earth, water, air, plants and animals.

Suggested Activities:

1. Conduct research to local bacterial problems, can these be solved? How?
2. Find out major bacterial problems that come from the school or home.
3. Discuss how the wrong type of bacteria is a major concern and what authorities are doing about it.
4. Use the online dictionary by typing the following in the ‘Google’ search engine;

define: bacteria

By typing the word ‘define:’ with a colon after and whatever word you are looking for, will display web sites that deal with the meaning of that particular word.

Outcomes:

Science – the human environment, bacteria problems

Maths – working with graphs

Technology – conduct research using the Internet
