

fire

Your name: _____

Materials needed: old magazines, scissors, glue

Read: Fire can happen by accident in the bush. Lightening strikes can start a fire. Sometimes people light fires on purpose and much bush gets burned. Fire can be very bad for the environment but some plants actually thrive after a fire has gone thru. Many animals suffer when a fire goes thru and lose their homes, some even die.

Task: glue pictures on your worksheet that show the devastation of the bush after a fire has gone thru.
